Professional Profile

Energy industry professional with ~20 years' experience spanning subsurface evaluation, business development, and strategic project assessment operating at senior individual contributor / manager level within a major international energy company. Strong track record in CCS, offshore wind, and emerging energy opportunities, combining deep technical expertise with growing commercial and financial capability. MBA candidate with a clear interest in energy transition, value creation, and disciplined investment decision-making.

Professional Experience

INPEX Europe Limited — *Business Development Manager* \ 2023 – Present

- Origination, screening, and evaluation of new energy opportunities with a focus on CCS and offshore wind in the UK and Europe.
- Lead business development initiatives, coordinating inputs across technical, commercial, legal, and external advisory teams.
- Develop strategic assessments of project value, risk profile, and market positioning for senior management.
- Monitor energy transition policy, market trends, and emerging technologies to inform corporate strategy.
- Provide technical subsurface input to CCS project evaluations, including storage assessment and risk framing.

INPEX Corporation — *Senior Geoscientist* \ 2013 – 2023

- Technical and commercial support for carbon capture and storage (CCS) and hydrogen business development initiatives in Europe.
- Evaluation of upstream oil & gas investment opportunities, including prospect risking, portfolio screening, and partner assessments.
- Maintenance and development of regional subsurface databases to support investment decisions.
- Mentoring and development of junior technical staff within multidisciplinary project teams.

PGS Reservoir, Asia Pacific — *Project Geoscientist* \ 2011 – 2013

- Delivered integrated geological and geophysical studies across Southeast Asia.
- Presented project results at industry conferences and client engagements.

PGS Reservoir, UK — *Geoscientist* \ 2007 – 2011

- Regional geological mapping, prospectivity studies, and seismic interpretation.
 - Supported exploration programmes through data integration and risk communication.
-

Education

Master of Business Administration (MBA) (*Part-time*) \ The Open University | 2023 – 2026 (expected)

- Completed modules include: Managing in a Changing World; Creating and Sustaining Value; Effective Strategic Management; Finance for Strategic Decision Making; Business Human Rights Law and Corporate Social Responsibility.

MSc Petroleum Geoscience \ Royal Holloway, University of London | 2006 – 2007

- Thesis: Gas storage potential in the Southern North Sea.

BSc (Hons) Geological Sciences \ University of Leeds | 2002 – 2005

- Dissertation: Deformation of Carboniferous strata.
-

Core Skills

- **Strategic & Commercial Analysis:** Evaluation of complex investment cases, option framing, and value drivers.
 - **Energy Transition Expertise:** CCS, offshore wind, hydrogen, and UK decarbonisation pathways.
 - **Financial Acumen:** Understanding of financial models, assumptions, and risk-adjusted decision-making.
 - **Leadership & Stakeholder Management:** Clear communication of strategy and technical concepts to multidisciplinary teams.
 - **Risk Management:** Scenario analysis and risk framing to support investment decisions.
 - **Subsurface Expertise:** Geological interpretation, seismic analysis, and data integration.
 - **Global & Cross-Cultural Working:** Experience across Europe, Asia Pacific, and Australia.
 - **Ethics & Corporate Responsibility:** Strong appreciation of ESG, corporate accountability, and societal impact.
-

Selected Projects & Achievements

- Assessment of offshore wind farm acquisition opportunities, including coordination with external advisers and internal stakeholders; contribution to asset valuation and risk assessment.
 - Research and internal reporting on UK decarbonisation strategy, covering regulatory, technical, and commercial considerations.
 - Development of GIS-based exploration databases in West Africa to improve data integration and strategic risk communication.
 - Partner evaluations for multiple exploration and production ventures.
 - Interpretation and client-facing presentation of newly acquired 3D seismic data in Papua New Guinea, identifying and promoting hydrocarbon prospects.
 - International assignments in Australia and Singapore.
