

Andrew Botsford BSc, MSc, FGS, MBA

Energy Transition | Business Development & M&A | CCS, Offshore & Onshore Wind

Witley, Godalming, Surrey, UK • +44 (0) 7885 976023 • andrewbotsford45@hotmail.com

Portfolio: andrb1984.github.io/Portfolio

PROFESSIONAL PROFILE

Energy industry professional with ~20 years' experience spanning subsurface evaluation, business development and strategic project assessment, operating at senior contributor / manager level within a major international energy company. Strong track record originating and evaluating investment opportunities across CCS, offshore wind (fixed and floating) and onshore wind, combining deep technical expertise with financial modeling and commercial deal experience. Recently completed an MBA with a clear focus on energy transition, value creation and disciplined investment decision-making.

PROFESSIONAL EXPERIENCE

INPEX Europe Limited : Business Development Manager 2023 – Present

- **Origination & screening:** Identify, screen and prioritise new energy investment opportunities across CCS, offshore wind (fixed and floating) and onshore wind in the UK and Europe.
- **Financial modeling & valuation:** Build, review and stress-test DCF models covering project and equity free cash flows, IRR/NPV, gearing and debt-service, producing risk-adjusted valuations to inform offer levels.
- **Scenario & sensitivity analysis:** Run sensitivities on power-price/CfD strike, load factor, CAPEX/OPEX and discount rate to define value ranges and downside cases.
- **Adviser & process management:** Coordinate legal, financial/commercial, technical and tax advisers through NDA, RfP, due diligence and offer stages, including adviser selection and fee benchmarking.
- **Transaction documentation:** Prepare non-binding offers and internal authorisations; support review of transaction documentation including NDAs and SPAs.
- **Investment papers & governance:** Prepare investment recommendations and approval papers for senior management and INPEX HQ, translating technical and commercial analysis into clear decisions.
- **Strategy & market intelligence:** Monitor energy-transition policy, NECPs and market trends across European power markets to shape corporate strategy and target screening.

INPEX Corporation : Senior Geoscientist 2013 – 2023

- Technical and commercial support for CCS and hydrogen business development initiatives in Europe, including subsurface storage assessment and risk framing.
- Evaluated upstream oil & gas investment opportunities, including prospect risking, portfolio screening and partner assessments.
- Maintained and developed regional subsurface databases to support investment decisions; mentored junior technical staff in multidisciplinary teams.

PGS Reservoir, Asia Pacific : Project Geoscientist 2011 – 2013

- Delivered integrated geological and geophysical studies across Southeast Asia; presented results at industry conferences and client engagements.

PGS Reservoir, UK : Geoscientist 2007 – 2011

- Regional geological mapping, prospectivity studies and seismic interpretation; supported exploration programmes through data integration and risk communication.

SELECTED TRANSACTIONS & ACHIEVEMENTS

- **Onshore wind acquisition (100%, ~94 MW, UK):** Led first-round evaluation of a fully de-risked onshore wind asset offered via forward-sale structure. Built and reviewed the DCF against the vendor financial model, benchmarking capacity factor, CAPEX and asset-life assumptions; managed the NDA and adviser process and prepared the internal recommendation. Combined enterprise value assessed of £120m.

- **Offshore wind partnership (multi-GW, UK North Sea):** Assessed acquisition of a stake in a large CfD-backed offshore wind project, reviewing contracted-revenue profile, project-financing structure and equity vs enterprise value under a non-recourse financing package.
- **Operational offshore wind (equity valuation):** Valued an operational offshore wind asset on an equity basis, reconciling equity value against enterprise value inclusive of generation and transmission debt, and reviewing independent technical vendor due diligence.
- **Offshore wind adviser selection (Poland, 40% stake, ~390 MW):** Led the RfP and adviser-selection process across Lead, Financial/Commercial, Technical and Tax workstreams, reviewing and benchmarking competing proposals from major advisory firms.
- **Floating offshore wind pre-offer valuation:** Produced pre-NBO DCF and risked-NPV valuations with full sensitivity analysis (CfD strike, load factor, CAPEX, discount rate) to derive a supportable offer level for an early-stage floating project.
- **Decarbonisation & market strategy:** Authored internal research on UK decarbonisation strategy and a cross-country European renewables market-attractiveness assessment used in management strategy packs.
- **Subsurface & exploration:** Built GIS-based exploration databases in West Africa; interpreted and presented 3D seismic in Papua New Guinea to promote hydrocarbon prospects; international assignments in Australia and Singapore.

EDUCATION

Master of Business Administration (MBA) : The Open University (Open University Business School) **2023 – 2026**

- Triple-accredited MBA (AMBA, EQUIS and AACSB) — an accreditation held by fewer than 1% of business schools worldwide.
- Modules: Managing in a Changing World; Creating and Sustaining Value; Effective Strategic Management; Finance for Strategic Decision Making; Business, Human Rights Law and Corporate Social Responsibility.

MSc Petroleum Geoscience : Royal Holloway, University of London **2006 – 2007**

- Thesis: Gas storage potential in the Southern North Sea.

BSc (Hons) Geological Sciences : University of Leeds **2002 – 2005**

- Dissertation: Deformation of Carboniferous strata.

CORE SKILLS

- **Investment Evaluation & Financial Modelling:** DCF, NPV/IRR, equity vs enterprise value, scenario and sensitivity analysis. Reviewed 10+ financial models 2025/26 and similar number of project IMs.
- **M&A & Deal Execution:** Origination, NDAs, RfPs, adviser management, due diligence, non-binding offers. Screened numerous renewable opportunities 2020s, also acted as technical support for CCS and hydrocarbon opportunities on several occasions. Networking to build contacts and support strategy execution.
- **Energy Transition Expertise:** CCS, offshore & onshore wind, hydrogen, UK/EU decarbonisation and NECP policy. Independent research of various European markets and reporting to executive level management.
- **Strategy & Commercial Analysis:** Market-attractiveness assessment, option framing, value drivers. Implemented several screening workflows to enable consistent and informative decision making.
- **Subsurface & Technical Expertise:** GIS mapping and analysis. Storage assessment, seismic interpretation, well data analysis, geological risk framing.
- **Stakeholder & Cross-Cultural Leadership:** Clear communication across multidisciplinary and international teams (Europe, Asia Pacific, Australia).
