- **BSc (Hons) Geological Sciences (2002-2005):** University of Leeds

- Dissertation on Carboniferous strata deformation.

Skills

- **Adaptable and Innovative:** Able to recognise trends, identify impacts and take meaningful decisions on how to act.
- **Strategic Thinking and Analysis:** Systematic reviewer of complex business situations, able to formulate and evaluate options.
- **Financial Acumen:** Understanding of financial modelling and inherent assumptions, able to prioritise and focus on key value drivers.
- **Leadership and Management:** Able to form visions and present clear translation to colleagues and partners.
- **Risk Management:** Application of methods to model and appreciate scenarios aiding investment decisions.
- **Interdisciplinary Skills:** Able to see the bigger picture and recognise how different business units interconnect.
- **Global Perspective:** Appreciation of cultural diversity and the nature of context in business. Experience working in diversified global teams.
- **Corporate Responsibility and Ethics:** Strong appreciation for business to do good for society and to demonstrate accountability.
- **Geology and Geophysics:** Data compilation, well data analysis, seismic data interpretation.

Projects and Achievements

- Evaluation of offshore wind farm assets for potential asset acquisitions. Engaged with external advisors and managed internal stakeholder requirements. Formulated asset valuations based on team input.
- Research into the UK decarbonisation strategy and reporting of technical and commercial factors. Attendance at numerous conferences and author of several internal reports.
- Compilation of exploration data within GIS database in West Africa. Developed workflows to integrate data and provide simple risk communication to strategic colleagues.
- Partner evaluation of several oil and gas exploration and production projects.
- Analysis and Presentation of newly acquired 3D seismic data in Papua New Guinea. Identification of hydrocarbon prospects and promotion of data to clients.
- International assignments in Australia and Singapore.
